UbiCamp
INTEGRATED SOLUTION TO VIRTUAL MOBILITY BARRIERS

A new way to study in Europe!

You're not in just one university any more...

Whether you are in Izmir, Kaunas, Madrid, Napoli, Oviedo or Southampton, you can join a multi-university virtual community and choose from a growing range of online course modules.

Lifelong Learning
What is Virtual mobility?

Social media and virtual networking are now routine parts of every student's life. Wherever you are located, you can communicate, participate in activities, play, and even travel virtually. So, universities have come together to form **UbiCamp**, a project to let you study virtually. We call it "virtual mobility" because it takes you to a different university in another country without the need to travel. It lets you communicate with teachers and fellow students from other parts of Europe, interact in virtual environments, carry out joint projects, and create ideas together.

UbiCamp course modules are provided by the universities of Oviedo and Southampton and universities in Izmir (Yasar University), Madrid (Universidad Autonoma), Napoli (Pegaso Telematic University), and Kaunas (Vytautas Magnus University and Kaunas University of Technology).

Go to the website
www.ubicamp.eu
to see more details of the modules you can choose through **UbiCamp.**

Benefits of virtual mobility include

- Widening your choice of modules

- Experiencing the life and culture of a university abroad without having to travel

- Enriching your curriculum

- Cost-effectiveness: there are no special fees or costs

- Gaining professional and intercultural skills

- Gaining skills in up-to-the minute information/communication technology

- Timetable flexibility

- Being able to take part wherever you are

- Making new friends and contacts
